INTERIM UPDATE #24

SUBJECT: New Object Class Codes

NEW MATERIAL: Series 600 Interim Update #16 contained a listing of new object class codes to be used Agency-wide effective October 1, 2000. As the implementation data for Phoenix has been postponed, the effective date for use of the codes in the 9/18/2000 general notice is being postponed. (See [Series 600 Interim Update #16](#))

EFFECTIVE DATE: 10/11/2000

POLICY

**USAID/General Notice
M/B
10/11/2000**

SUBJECT: New Object Class Codes

USAID General Notice dated 9/18/2000 contained a listing of new object class codes to be used Agency-wide effective October 1, 2000. At the time of issuance of the notice it was anticipated that Phoenix would become operational on October 1, 2000. As the implementation data for Phoenix has been postponed, the effective date for use of the codes in the 9/18/2000 general notice is being postponed. For Washington, the new codes will become effective on the date Phoenix becomes the system of record. Until that time the Resource Category Codes in NMS will continue to be used. For field missions the Expanded Object Class Codes in MACS will continue to be used until the patch referred to in the 9/18/2000 notice is issued, at which time the new codes are to be used.

POINT OF CONTACT: Address any questions regarding this notice to Marcus Rarick, M/B/SB, (202)712-4523.
